3 KEYS

TO CREATE A SUCCESSFUL PROJECT

A successful project is a byproduct of proper planning, direct communication, and organization.

Planning

Face-to-face meeting to discuss variables of the project. This also allows key members of our team to meet your team which builds a solid surface in a remote engagement.

Planning to include: day-to-day process, flow, and expectations of TTUHSC.

1

2

3

Organization

Demonstrating benchmarks and milestones of an engagement along with invoicing are certainly a necessary part of any project. Our team will request how TTUHSC would like this information reported and what format works best to ensure the project is organized for both parties.

Communication

The DM team will request weekly meetings at the beginning of the project. As the project advances, these calls can be advanced to biweekly/monthly, but our preference is to maintain monthly client calls to ensure projects remain on track.
